

CLIMATE CHAOS

Deadly Wildfires, Heat Waves, Super Storms

WHAT'S CAUSING IT? Extra heat trapped by man-made gases from OIL, NATURAL GAS AND COAL (mostly Carbon Dioxide and Methane called Green House Gases - GHGs)

The #1 problem In Santa Cruz county is DRIVING

ARE WE DOOMED? NOT if we act quickly! We will have to deal with warmer temperatures and rising sea level but we can minimize these.

WHAT CAN WE DO?

DRIVE LESS: walk, bike, bus, carpool, ecars, ebikes
Use clean energy from MBCP. Use solar and wind.

EAT LESS MEAT: cows make METHANE, a super heat trapping gas.

WASTE LESS FOOD: Rotting food also makes methane We waste a THIRD of the food grown.

BUY LESS unneeded stuff.

SWITCH from NATURAL GAS to CLEAN ELECTRICITY

No new gas hook-ups for buildings.

Push for a **GREEN NEW DEAL** to address the CLIMATE CRISIS and be FAIR to EVERYONE

GOAL Zero Carbon by 2030

CLIMATE ACTION NOW!!

For more information go to **scrucclimate.org** and click on **Beginners Guide to Climate Change**

Ask your employers and neighbors and family to help make the necessary changes.

For transportation options in Santa Cruz go to <http://www.cityofsantacruz.com/how-do-i/go-santa-cruz>

This includes carpool information and free bus passes for downtown workers.

VOTE for people willing to make the right decisions.

Think about the problems the young people will face if we don't act quickly

TAKE YOUR MONEY OUT OF CHASE & WELLS FARGO and put it into local banks

Don't be afraid to talk about your feelings

TOGETHER WE CAN MAKE A LIVABLE FUTURE
